SKILLS

PROGRAMMING: PYTHON,C, TENSORFLOW, KERAS, SCIKIT-LEARN
BACKEND: FLASK, REST APIS
TESTING: PYTEST
TOOLS: GIT, GITHUB
CONCEPTS: CRUD, CLEAN ARCHITECTURE, API DESIGN
BASICS: HTML, CSS, PANDAS, NUMPY
DATABASES: MYSQL

HACKATHON EXPERIENCE:

1.SMART INDIA HACKATHON – 2023 & 2024

2.NASA INTERNATIONAL SPACE APPS CHALLENGE

PROJECTS:

1. Potato Leaf Disease Detection (Machine Learning Project)

Tech: Python, TensorFlow, CNN, OpenCV, Flask

- Developed a CNN-based model to classify potato leaf diseases with ~92% accuracy
- Performed image preprocessing, segmentation, and data augmentation using OpenCV
- Built a Flask-based web application for real-time disease prediction
- Gained hands-on experience in ML model deployment and inference workflows

2. Defence Sector Project – Smart India Hackathon 2024

- Developed a secure communication system for defense-oriented applications
- Integrated data encryption and secure access protocols
- Collaborated with a team to deliver a robust solution under strict timelines

EDUCATION:

Bachelor of Technology (B.Tech)
Computer Science and Engineering
Dr. A.P.J. Abdul Kalam Technical University
Expected Graduation: 2026

CERTIFICATIONS:

- Oracle Advanced PL/SQL Developer Certified Professional
- HackerRank FASTAPI Certification
